# Yellow Head Viruses

## 2020 October - ICTV *Roniviridae* update

Family *Roniviridae* (subfamily *Okanivirinae*)

Genus *Okavirus* (subgenus *Tipravivirus*)

Three species of virus

\***Gill-associated virus** = yellow head virus genotype 2

**Yellow head virus 1**

**Okavirus 1** = yellow head genotype 8

Yellow head virus genotypes 3-7  
have not yet been classified  
(complete genome sequences not available)

## Roniviridae

### CHAPTER 2.2.9.

#### **INFECTION WITH YELLOW HEAD VIRUS GENOTYPE 1**

##### **1. Scope**

Infection with yellow head virus genotype 1 means infection with the pathogenic agent yellow head virus genotype 1 (YHV1) of the Genus *Okavirus* and Family *Roniviridae*.

## **Molecular Techniques (ORF1b PCRs)**

Protocol 1 YHV-1 RT-PCR

Protocol 2 YHV-1/GAV differentiation RT-nPCR

Protocol 3 YHV RT-nPCR

- Analytical specificity issues for each PCR amongst various YHV genotypes.
- No real-time PCR for YHV-1 listed.

# Yellow Head Viruses

## Yellow head virus genotypes

- Lack of standardised criteria to naming
- YHV-7 to YHV-11 identified due to YHV PCR assay specificity issues

New yellow head virus genotype (YHV7) in giant tiger shrimp *Penaeus monodon* indigenous to northern Australia

Genotype	Year	Distribution	Health Status
YHV-1 (YHD)	1990s	Chinese Taipei, Indonesia, Malaysia, Philippines, Thailand, Taiwan, Mexico...	Yellow head disease (OIE listed)
YHV-2 (GAV)	1990s	Australia, Thailand, Vietnam...	Healthy and associated with disease
YHV-3	2000	Indonesia, Thailand, Malaysia...	Healthy
YHV-4	2002	India...	Healthy
YHV-5	2003	Malaysia, Philippines, Thailand...	Healthy and slow growth
YHV-6	2004	Mozambique, Australia...	Healthy
YHV-7	2012	Australia...	Associated with diseased broodstock
YHV-8 (Okavirus 1)	2012	China...	Associated with APHND-like disease
YHV-9	2014	Imported commodity prawns...	Unknown
YHV-10	2014	Imported commodity prawns...	Unknown
YHV-11	2016	Imported commodity prawns...	Unknown
